

Australian Society of Dental Anaesthesiology

## Our Courses

### Managing Emergencies for the Dental Team

Wed 8th October 2014

**1 Day** - Lectures and practical elements focussed on how to recognise and manage medical emergencies within the **general dental environment**

Includes CPR Certificate

No prior knowledge required

Suitable for the entire dental team

Recommended for general dentists and their teams, or conscious sedation practitioners seeking additional preparation prior to re-endorsement

### Emergency Management Skills Workshop

Thu 9th October 2014

**1 Day** - Lectures and hands-on training, focussed on emergency management skills in **conscious sedation practice**

Familiarisation with SimMan and simulated clinical environments

Review of emergency management knowledge and skills required for sedated dental patients

No prior knowledge required

Recommended for conscious sedation practitioners preparing for re-endorsement, dentists performing treatment on sedated patients and their teams

### Medical Emergencies and the Sedated Patient (AHPRA/DBA re-endorsement)

Fri 10th October 2014

**1 Day** - Simulation-based, immersion training **required for conscious sedation re-endorsement by AHPRA/DBA**

Focussed on emergency management and skills required within a conscious sedation practice

Prior knowledge and skills in advanced life support of the sedated patient are required

Recommended for conscious sedation practitioners applying for AHPRA/DBA re-endorsement
